Understanding Your Bill

The Ontario Energy Board regulates and approves Enbridge's charges. Your bill is based on either actual metered consumption or estimated consumption.

CCF: 100 Cubic Feet

Cost Adjustment: A refund or charge to reconcile the difference between what Enbridge forecasted to pay and what Enbridge actually paid. The Cost Adjustment may include components for natural gas supply, transportation and delivery, depending on the products and services a customer receives from Enbridge.

Cubic Meters (m³): A measure of the volume of gas consumed. One cubic meter is equal to 1,000 litres.

Customer Charge: The cost of our operations, customer and emergency services. This charge is billed monthly whether or not you consume gas during the month.

Delivery to You: The cost to safely and reliably deliver natural gas through Enbridge's distribution system to your premises and billed based on the amount of natural gas consumed. This charge is on a descending scale: the more gas consumed, the lower the charges per cubic meter (m³).

Gas Supply: The cost of the natural gas itself. You can choose to buy natural gas from Enbridge or a marketer (in which case, the price you pay for the Gas Supply Charge depends on the contract terms with your marketer). This charge is billed based on the amount of natural gas consumed.

Pressure Elevation Factor (PEF): A minor adjustment to the amount of gas you use (as measured by your gas meter) to compensate for the variation in gas volumes at different elevations (atmospheric pressure).

Transportation to Enbridge: The cost of transporting natural gas from Western Canada and the US to Enbridge in Ontario. You can choose to buy transportation services from Enbridge or a marketer (in which case, the price you pay for the Transportation to Enbridge charge depends on the contract terms with your marketer). This charge is billed based on the amount of natural gas consumed.
